

Are You Getting PQRI Bonus Money From CMS?

KEARSARGE HEALTHCARE CONSULTING, Inc.

Get a free PQRI (Physician Quality Reporting Initiative) assessment* and 2% additional revenue from CMS. Whether you're planning to implement PQRI using claims based methodology or using a registry to submit data, Kearsarge Healthcare Consulting, Inc. provides your organization with a return on investment analysis to clearly understand your options.

After the assessment Kearsarge Healthcare Consulting, Inc. will work with your organization to determine a cost effective way to get your 2% bonus from FFS CMS revenue. We will develop reports and submit your data directly to CMS leaving your organization with nothing left to do but collect the money.

Use PQRI reports to manage care effectively. You can monitor your CMS PQRI performance throughout the year and manage quality care based on the results. Additionally, while the PQRI program is about submitting data to CMS, future CMS programs and many current insurers will pay based on outcome thresholds. Get ahead on getting paid for performance outcomes by reporting on PQRI today.

Many organizations are struggling to interpret PQRI reporting requirements and fail to develop the reports and submit data to CMS. In 2007, just less than half of all eligible providers submitting PQRI data failed to collect the bonus revenue from CMS because the information was not properly submitted.

Kearsarge Healthcare Consulting, Inc. is a healthcare data reporting company dedicated to supporting the advancement of quality care through accurate and timely clinical and financial data.

For as little as \$1,400 for the first three physicians our registry will report on three preventive care measures. Or KHC can customize your needs by reporting on multiple measures across several specialties.

Benefits of Registry Reporting

- ✓ Ability to monitor clinical performance throughout the reporting year
- ✓ Typically no additional work is required by the clinical staff
- ✓ More cost effective than claims based
- ✓ Greater success rates with electronic reporting
- ✓ CMS intends to move away from claims based reporting to electronic reporting
